

Planning healthy meals

Diabetes and healthy eating

Good diabetes self-care includes following a healthy eating plan. Try to:

- Eat a variety of foods in the right amounts
- Check food labels for calorie, carbohydrate, total fat, and sodium amounts
- Eat regularly (small portions several times a day)
- Match how much you eat with your activity level
- Eat fewer foods high in calories, cholesterol, saturated fat, trans fat, and sodium

Talk with your diabetes care team if you have any questions about your healthy eating plan.

Making healthy food choices

- Lots of nonstarchy vegetables
- Whole-grain foods
- Fish at least 2 times a week
- Lean cuts of beef and pork
- Remove skin from chicken and turkey
- Non-fat or low-fat dairy products
- Water, unsweetened tea, coffee, and calorie-free “diet” drinks instead of drinks with sugar
- Liquid oils for cooking instead of solid fats
 - Limit quantities
- Choose whole foods over processed foods whenever possible

Ask your diabetes care team how many fruits a day are right for you

Tips for dining out with diabetes

- If you don't know what's in a dish or how it's prepared, ask
- Ask for salad dressing, sauces, and gravy on the side
- Estimate your normal portion and put the extra in a container to go
- Try to limit alcohol and sugary drinks, or avoid them
- Don't rush! Eat slowly and really enjoy your meal

Estimating portion sizes

When you can't measure, you can estimate!

Keep in mind that all hands are different sizes. Before you estimate, compare your fist size to a measuring cup.

Portion size is the amount of a food you choose to eat at any one time.

Serving size is a set, measured amount of food as shown on the label below.

A loose fist equals about 1 cup
(milk, yogurt, dry cereal, etc.)

A palm equals about 3 ounces
(cooked, boneless meat)

A thumb equals about 1 ounce or 1 tablespoon
(peanut butter or salad dressing)

Reading a Nutrition Facts label

Use it to compare foods and to help you make decisions about the foods you choose to eat.

Check serving size. Information on the label is based on 1 serving. Keep in mind that packages often contain more than 1 serving. This example shows that the package contains 8 servings. But the food facts given are for only 1 serving.

Look at the amount of fat. Try to limit saturated fats and avoid trans fats.

Check how many grams of total carbs are in each serving. This number is important if you are counting carbs.

Notice how many grams of fiber are in each serving. Dietary fiber has many benefits on your body, such as helping to lower cholesterol. Therefore, try to choose foods with the most fiber.

Look at how many grams of added sugar the food contains. This is sugar that has been added as the food is made. Try to choose foods with less added sugar.

* The % Daily Value (DV) tells you how much a nutrient in a serving of food contributes to a daily diet. 2,000 calories a day is used for general nutrition advice.

Know your nutrients and create your plate

1. Nonstarchy Vegetables

Fill half your plate with nonstarchy vegetables such as salad greens, broccoli, cauliflower, or squash.

2. Protein Foods

Fill one quarter of your plate, about 3 ounces, with lean protein foods. Fish, chicken, lean beef, soy products, and cheese are all foods that are high in protein.

3. Carbohydrate Foods

Fill one quarter of your plate with carbohydrate foods like whole grains, starchy vegetables, fruit, or dairy.

4. Water or a 0-calorie drink

Choose a drink without calories or carbs like water or unsweetened tea or coffee (hot or iced).

Each carb serving listed contains 15 grams of carbs.

I need _____ grams of carbs per meal.

Ask your diabetes care team what the right amount of carbs is for you.

Nonstarchy Vegetables

- Do not raise blood glucose very much
- High in vitamins, minerals, and fiber, making them an important part of any healthy eating plan
- 1 cup raw or ½ cup cooked = 5 grams of carbohydrates

Artichoke hearts

Asparagus

Baby corn

Bamboo shoots

Bean sprouts

Beans (green, wax, Italian)

Broccoli

Brussels sprouts

Cabbage (green, bok choy, Chinese)

Carrots

Cauliflower

Celery
