Education + Resources

DIABETES

Your blood glucose tracker

A diary of your blood glucose (*sugar*) levels

If you've received this tracker without the ***Staying on track*** booklet, you can ask your diabetes care team for the booklet. It will give you more information about blood glucose goals and what your numbers mean.

To order additional trackers, please call **1-800-727-6500** (option 8 for Spanish) from 8:30 AM to 6:00 PM EST.

Your blood glucose tracker

Keeping track of your blood glucose is a good way for you and your diabetes care team to see how well your diabetes care plan is working. This tracker can help you do that.

Bring it to visits with your diabetes care team. Sharing it helps all of you see how well your diabetes care plan is working.

Your blood glucose tracker Date: ___/___/___

*You and your diabetes care team will decide the best times for you to check your blood glucose.

Guide to adjusting your mealtime insulin dose

If your doctor has told you to adjust your mealtime insulin dose, have them complete this section for you and walk you through the example. Change or adjust your mealtime dose only as instructed by your doctor.

Day 1 starting dose:

2 When to take mealtime insulin: ☐ Breakfast ☐ Lunch ☐ Dinner

3 When to check blood glucose: Before lunch Before dinner At bedtime

4 If your blood glucose reading is: The next day you should:

___ or less (example: 80 or less) ☐ subtract ___ units

Between ___ and ___ (example: between 81 and 130) ☐ Take the same dose you took today

___ or more (example: 131 or more) ☐ Add ___ units

Exp. 11/2024

Visit **NovoCare.com** to learn about the different types of medicines for diabetes.

Adding or starting insulin

For many people, adding insulin to a diabetes care plan is needed to further help manage blood glucose levels. It does not mean that you've done anything wrong in managing your diabetes. It just means that your diabetes has changed over time. There are different types of insulin. You and your diabetes care team will select the type of insulin that is right for you.

You and your doctor can use the guides below to help you with adding long-acting or mealtime insulin into your diabetes care plan. Ask your doctor to fill in the chart on page 55 or 57. Make sure you understand what the chart means for you.

With the help of your diabetes care team, you can find an insulin plan that will help manage your blood glucose levels and fit your routine.

You may have to take medicine to help you reach your blood glucose goals. To learn more about the different diabetes medicines, ask your diabetes care team for the booklet, *Living with diabetes*.

If your doctor wants you to adjust your mealtime insulin.

Guide to adjusting long-acting insulin

Long-acting insulin provides steady insulin levels throughout the day and night. **If your doctor has told you to adjust your long-acting insulin dose**, have them complete this section for you.

My dose ____ unit(s) at ____ time		My dose ____ unit(s) at ____ time (if needed)	
My morning blood glucose target _____			
If your morning blood glucose reading before eating is:		Then you should:	
____ or less (example: 80 or less)		⊖ Subtract ____ unit(s)	
Between ____ and ____ (example: between 81 and 130)		✓ Take the same dose	
____ or more (example: 131 or more)		⊕ Add ____ unit(s)	
Do not take more than ____ units without talking to your doctor.			

Guide to tracking mealtime insulin

Your blood glucose tracker

Long-acting insulin dose	_____ units _____ time		If needed at dinner or bedtime: _____ units _____ time					
WEDNESDAY								
Non-insulin medicine and dose								
10 mg medicine A	6 am	8 am						
	90 mg/dL	150 mg/dL						
Carb intake	20 grams							
Mealtime insulin dose	<input type="checkbox"/> Breakfast ___ units		<input type="checkbox"/> Lunch ___ units		<input type="checkbox"/> Dinner ___ units		Other: _____	
Long-acting insulin dose	_____ units _____ time		If needed at dinner or bedtime: _____ units _____ time				BP: 120/80	

*You and your diabetes care team will decide the best times for you to check your blood glucose.

- 1 Your starting dose
- 2 When to take insulin. This example assumes dinner
- 3 When to check (in this example, bedtime)
- 4 Adjust your mealtime insulin dose based on table below

Your next day's dose

Repeat above process every day

Guide to adjusting your mealtime insulin dose

If your doctor or health care provider has told you to adjust your mealtime insulin dose, have them complete this section for you and walk you through the example. **Change or adjust your mealtime dose only as instructed by your doctor.**

1 Day 1 starting dose:

2 When to take mealtime insulin:	<input type="checkbox"/> Breakfast	<input type="checkbox"/> Lunch	<input type="checkbox"/> Dinner
3 When to check blood glucose:	Before lunch	Before dinner	At bedtime
4 If your blood glucose reading is:	The next day you should:		
_____ or less (example: 80 or less)	⊖ Subtract ___ unit(s)		
Between _____ and _____ (example: between 81 and 130)	✔ Take the same dose you took today		
_____ or more (example: 131 or more)	⊕ Add ___ unit(s)

If your glucose reading is:

The next day you should:

_____ or less
(example: 80 or less)

Subtract ___ unit(s)

Between ___ and ___
(example: between 81 and 130)

Take the same dose you took today

_____ or more
(example: 131 or more)

Add ___ unit(s)

My medicines

Where to inject your diabetes medicine

Injections of diabetes medicines are most often given in the layer of fat just under the skin in these areas of the body:

- Abdomen (except a 2-inch circle around your belly button)
- Thighs (top and outer parts)
- Back of upper arms
- Buttocks

Move where you inject at least one inch from your last one in a recommended area of the body shown here. Be sure to avoid injecting in the same spot.

Tear off card at dotted line.

Insulin Dosing Guide

Ask your doctor to complete the other side of this card for you.
